I hate this.

Samples will arrive late Friday 7/6, if they need digesting (>1NTU) then that will happen on Monday 7/9, analysis will begin on Tuesday 7/10, 10 samples plus QC means 15 samples. If nothing goes wrong.....putting it close ?

Thanks for the quick review.

In reality we have until 7/10 to get the report out. With samples coming in on Friday let me know if we can't make that date but that's what we need to shoot for.

I'll let Kelley know about the other DOCs.

Thanks again,
Cindy

The method and QL for Mn is correct in the ARF, the TAT is not. Emails from Kelley Chase state a 7 day TAT requested not a 3 day TAT .

The other two DOCs list all parameters and QLs not just Mn.

Hi Kevin -

I was just told that we will LIKELY be given permission to conduct limited sampling at the two Carter residences (HW-8a and HW-8b), which share one well, to evaluate whether the existing treatment system is addressing the elevated manganese. Assuming we are given permission to sample, I understand that we will only be running the analysis for manganese. A total of three samples would be collected (one wellhead and two taps). QA samples would also be collected, as necessary. We would be looking for lab-validated results within 7 days of receipt of the samples.

Again - we still don't officially have the "green light" Hopefully this will be resolved today or tomorrow. I will get back to you ASAP to confirm the plans and schedule for sampling. Please contact me with any additional questions.

Thanks - Kelley

Since Kevin is out would you take a quick look at these documents to ensure that the right method and QLs are included and that is consistent with our understanding of Round 3?

Subject: Analytical Request for Dimock - July 2012

Dan/John,

Attached is the analytical request for the July 2012 sampling at Dimock which is scheduled to begin next week. The analyte/QL list and approved sampling plan are also attached.

Thanks,

Suddha Graves
